- Relevant attachments to Application are documents that will be the basis for Certification. These can be:
- Product description (detailed specification of the materials and components in the product, as well as technical drawings)
- Product characteristics and how these have been determined (test reports, calculations)
- Declaration of Performance (DoP) if available
- Usage and installation description
- Production control (descriptions of own control system and connections to third party schemes)

Send the application as an attachment to [certification@sintef.no](mailto:certification@sintef.no). or by post to SINTEF Byggforsk, Postboks 124 Blindern, 0314 Oslo. The attachments must also be included. The application is marked Application for SINTEF Product Certification. The Application must be as complete as possible and all attached information must be relevant to the product.
